

## SOFTWARE DEVELOPMENT

At BVC we help define your requirements, write specifications and design, develop, test and integrate software across multiple platforms -including internet technologies- enabling your system to function in the new operating environment.

We follow one of the two approaches to application development and integration:

### FULL LIFE-CYCLE APPLICATION DEVELOPMENT

In which we assume start-to-finish responsibility for analysis, design, implementation, testing and integration of systems;

### COOPERATIVE DEVELOPMENT,

In which our experts work with your-in-house IT personnel to jointly analyze, design, implement, test and integrate new systems. We create and deploy robust, scalable and extensible architectures for use in a wide range of industries.

Our custom application development service include:

- Application design, Development and Implementation
- System Integration/Consolidation
- Implementation of packages, Re-engineering, performance tuning and porting service
- Feasibility and requirement analysis for business case
